Little Apple Cars Service Commitment

Excellence at every turn... and every straightaway

Our dealership's primary goal is to satisfy every customer at every opportunity. You visit our service department regularly, and we have developed a number of ways to make your visit more comfortable and informative. We know that you want straight answers, and that's the only way we will deliver it to you.

We understand that your knowledge of your vehicle and its necessary repairs is probably not on par with the understanding that your technician has. In order to be sure that his findings and reporting is as clear and concise as possible, we use this Vehicle Information Booklet as a tool to help us communicate your vehicle's condition to you.

Our technicians are the most qualified to work on your vehicle. They have trained extensively, and partake in continuing education regularly to be sure that they are up to date on any changes and improvements handed down from the manufacturer. Our service advisors strive to make your experience with us a pleasant one. They are here to attend to your automotive needs as well as communicate effectively with your technician and you.

Please make yourself comfortable in our waiting area. Watch some TV, use your laptop with our free WI-FI access or just relax and enjoy the quiet. Our courtesy shuttle can take you shopping, to a movie or home if you prefer.

We appreciate your business and will continue to strive for excellence in everything we do for you.

Additional Service Recommendations

In the process of inspecting your vehicle for safety and reliability, your technician **Matt F** made the following observations and recommends that you do the necessary repairs to resolve these issues.

 Red: requires immediate attention.

 Yellow: in need of attention soon.

Windshield Replacement: Cracked

Item Description

The windshield of a vehicle is a transparent screen of glass put in place to protect the occupants in the vehicle. The vehicle's windshield protects the inside of the vehicle from the outside elements, as well as promoting the structural integrity of the vehicle.

Reason

If not replaced, a damaged windshield not only puts the driver and passengers at risk but also the other vehicles on the road if the windshield breaks completely.

Windshield

Cabin Air Filter Replacement

Item Description

Prevents dirt, pollen, and other debris from entering the passenger compartment through the climate control system.

Reason

If not replaced, the air conditioning system will develop an odd odor. The air conditioning filter, also known as the cabin filter, removes dust and pollen from entering the car cabin.

Cabin Air Filter

Engine Air Filter Replacement

Item Description

The air filter prevents dirt and debris from entering the engine, which could otherwise cause premature engine wear.

Reason

If not replaced, poor gas mileage and premature

engine wear will result.

Air Filter

[Other]: Driver's door check strap is broken allowing door to open too far and hit stops in hinges.

Item Description

Speak with your service advisor for more information on this recommended service.

Reason

Bulb - License Plate Light: Both

Item Description

The lights for illuminating the license plate on the back and/or front of a vehicle.

Reason

If not replaced, you will fail the vehicle inspection and could receive a ticket for improper equipment.

License Plate Light

Bulb - Side Marker Replacement: Both front

Item Description

A low-intensity lamp mounted on the side of a vehicle to indicate its presence when seen from the side.

Reason

Side Marker Light

An important added safety feature.

***Tires - 2: 205/55R16 - Rear tires 3/32**

Item Description

A tire is a round component made of rubber and reinforced with chords or belts made of several choices of materials. The tire is filled with air or nitrogen and surrounds a wheel's rim to transfer a vehicle's load from the axle through the wheel to the ground and to provide traction on the road's surface. With only four small contact patches between you and the road you want them to be as good as they can possibly be.

Reason

According to most states' laws, tires are legally worn out when they have worn down to 2/32" of remaining tread depth. As a tire wears it's important to realize that the tire's ability to perform in rain and snow will be reduced. With 2/32" of remaining tread depth, resistance to hydroplaning in the rain at highway speeds has been significantly reduced, and traction in snow has been virtually eliminated. If rain and wet roads are a concern, you should consider replacing your tires when they reach approximately 4/32" of remaining tread depth.

If snow-covered roads are a concern, you should consider replacing your tires when they reach approximately 6/32" of remaining tread depth to maintain good mobility. Because tread depth is such an important element for snow traction, winter tires usually start with noticeably deeper tread depths than typical All-Season or summer tires. Some winter tires even have a second series of "wear bars" molded in their tread pattern indicating approximately 6/32" remaining tread depth to warn you when your tires no longer meet the desired tread depth.

Tires

***Tire Balance and Rotate: Balance front tires and move to rear. Place new tires on front.**

Item Description

Balancing the vehicles tires are necessary to make sure the proper weight of the vehicle is distributed to the proper tire. Tire rotation helps protect tires against uneven wear by moving the tire location on the vehicle. Most tires will exhibit some form of wear based on numerous factors including: wheel alignment, miles driven, driving style and habits, and tire location on the vehicle. By moving or "rotating" the tires as recommended by the vehicle manufacturer, tires may wear more evenly; helping extend the life of the tires.

Reason

If not properly balanced, a vehicle's tires can experience abnormal wear which can significantly decrease the life of the tire. If not done, you will experience vibration in the steering wheel at certain highway speeds. Also, vibration will occur in the seat or floorboard at certain highway speeds. Tire wear will become scalloped or cupped.
